

Hello Lake Residents,

The 2018 Hess Lake Water Quality Data from Savin and Progressive AE is available under the Water Quality Tab.

Savin is responsible for the aerators, muck pellets, weed control and collecting water quality data in the coves where the aerators were running this past year.

Progressive AE is in charge of the three year lake study. Water Quality Data was collected at three locations in the lake and from six tributaries. The data was collected in April and August of 2018.

Happy Holidays!

Bob Ripstra
